SUMMARY

Data Analyst with experience since 2020 working on data ingestion, transformation, and automation in large-scale environments. Proficient in Python, SQL, and BigQuery, with hands-on experience building scalable ETL pipelines and integrating multiple data sources. Skilled in analyzing complex datasets to generate actionable insights and support business decision-making. Strong ability to collaborate with stakeholders and translate business needs into data solutions.

SKILLS

Data & Analytics: Python, SQL, BigQuery, Data Modeling, ETL, Data Visualization, Business Process Automation
BI Tools: Looker Studio, Looker Pro, Power BI, Lovable
Cloud & APIs: Google Cloud Platform (GCP), API Integration, Google Ad Manager API
Other Tools: GitHub, GitLab, Jira, Monday, Streamlit, Excel, Google Sheets, PySpark, Nekt, Bitrix, RD, Supabase
Languages: Portuguese (Native), English (Professional Proficiency)

PROFESSIONAL EXPERIENCE

Brognoli – Remote
Data Analyst (Part-time – 4h) | 11/2025 – 07/2026

- Developed data automation processes using Python, SQL, PySpark, and Nekt, integrating multiple data sources such as Bitrix CRM and RD Station.
- Implemented integrations via Nekt to unify customer data (e.g., opt-out synchronization between RD Station and Bitrix).
- Performed ad-hoc analyses to support decision-making and identify business improvement opportunities.
- Created backup tables for systems like Vista and Bitrix, ensuring data security and traceability.
- Developed scripts in Google Sheets for operational data automation and processing.
- Created and optimized dashboards to monitor business performance metrics.

Impact: Improved data reliability and validation for strategic dashboards, increasing operational efficiency through automation and system integrations.
Key Technologies and Tools: Python, SQL, PySpark, Google Colab, Nekt, Bitrix CRM, RD Station, Power BI, Google Sheets, Supabase, Lovable.

Act Digital – Remote
Data Analyst | Business Intelligence Analyst | 05/2025 – 04/2026

- Reduced rework by 50% by implementing a structured dashboard request process, including standardized forms for KPIs, data sources, and business rules.
- Developed and maintained Looker Studio dashboards to monitor media KPIs such as impressions and CTR,

increasing visibility for stakeholders.
- Designed and structured a data ingestion and modeling project for Adform log data, including table mockups and data architecture definition.
- Built a data pipeline using PySpark (Google Colab), organizing data into bronze, silver, and gold layers, including transformation and enrichment processes.
- Created a final analytical table combining log data (dimensions and calculated metrics) with additional data from reporting endpoints, ensuring a comprehensive performance view.

Impact: Accelerated dashboard delivery, improved alignment between business and data teams, and enabled scalable analysis of log data and integration of multiple programmatic media sources.
Key Technologies and Tools: Python, SQL, Google BigQuery, Google Cloud Platform (GCP), GA4, Streamlit, Looker Studio, Data Visualization, CSV, Google Sheets, Media KPIs, AdTech, Gitlab, Jira, Confluence, Agile methodologies, Brand Lift, PySpark.

Alright – Remote
Data Analyst | Analytics Engineer | 04/2024 – 09/2024

- Automated 10+ cron-based data ingestion processes from APIs and emails, cutting manual work and improving reliability.
- Built scalable ETL pipelines in Python and SQL, powering analytics with timely, structured data.
- Modeled datasets in BigQuery and created dynamic views that supported dashboards in Looker Studio and Looker Pro.
- Delivered clean data pipelines for AI/ML models, improving experimentation speed and accuracy.

Impact: Reduced reporting time and improved cross-platform marketing performance monitoring.
Key Technologies and Tools: Python, SQL, MySQL, Google BigQuery, Google Cloud Platform (GCP), Looker Studio, Looker Pro, ETL, Data Processing, API Integration, Data Visualization, Data Cleansing, CSV, JSON, Google Sheets, Media KPIs, AdOps, GitHub, Jira, Monday, Agile methodologies.

Instituto de Pesquisas Eldorado – Manaus, BR – Hybrid
Data Analyst | 01/2022 – 04/2024

- Identified root causes of customer complaints by analyzing telecom data, pinpointing operators, chipsets, and device characteristics behind failures.
- Directed troubleshooting to specific devices, accelerating issue resolution and improving customer satisfaction (NPS).
- Mentored junior analysts and built knowledge-sharing resources, reducing onboarding time and increasing analytical consistency.
- Collaborated with US-based cross-functional teams to deliver insights that influenced product improvements.

Impact: Improved user satisfaction, reduced time-to-resolution, and strengthened product reliability.
Key Technologies and Tools: SQL, Google BigQuery, Google Sheets, Looker Studio, Statistical Analysis, Python, Google Colaboratory, Streamlit, Data Science, Data Visualization, Mobile KPIs, Telecom, Jira, English, Agile Methodologies.

EDUCATION

Databricks Certified Data Engineer Associate | 2026

Specialization in Data Science
State University of Amazonas – UEA, BR | 2020 – 2022

Bachelor in Industrial Engineering
Federal University of Amazonas – UFAM, BR | 2010 – 2017
